

Simmons Integral Drop-in Sink and Drainer Units

Designed for fitment into a variety of work-surface materials, these units easily and inexpensively create a self-contained wet area of high chemical resistance by covering over core materials.

The sink and drainer units are designed to be fitted into a rebated cut-out in the work-top. The drainer has a built-in fall so that liquids can be washed down into the sink bowl.

SD15 drop-in sink and drainer unit

Sink unit size : 860 x 345 mm

Bowl size : 406 x 305 x 203 mm

SD55 drop-in sink and drainer unit

Sink unit size : 1067 x 423 mm

Bowl size : 635 x 381 x 254 mm

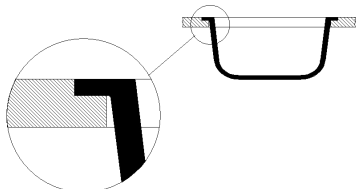

SIMMONS - Premier Select Sinks

Simmons Premier Select epoxy resin sinks offer our most versatile solution for efficient stocking and fitting of laboratory sinks. Produced using a low pressure moulding process, this core range of sinks is designed so that the same sink can be fitted using both:

Drop-in Fitment

Fitted from above and bonded into a suitable rebated cut out.

Undermount Fitment

Screwed and bonded on the underside of the worktop below a suitable cut-out.

- * Sinks in the range have the waste outlet located unobtrusively to the right rear corner.
- * Sinks are moulded with a smooth, hardwearing surface which is easy to clean and decontaminate.
- * They are light and easy to handle.
- * Supplied boxed with a waste fitting
- * Further details can be found at epoxyworktops.com
